

File Manager

The File Manager application allows you to look at files in the file system of the SL-5500. (For Experts Only)

You can not only open files with the application that the SL-5500 can handle, but also edit them (copy, rename, delete, etc.).

Read the separate Start-up Guide (booklet) first.

Caution: Do not handle files, that are preinstalled on this unit with this application. Otherwise they may not operate properly.

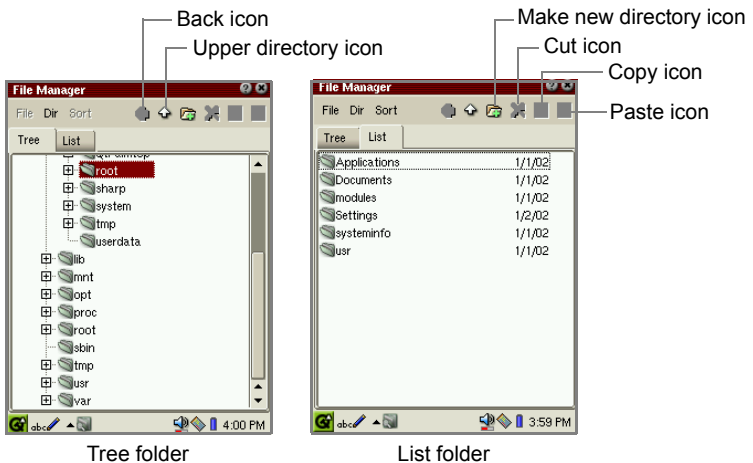

Overview

1. In the Applications folder of the Home screen, tap the “File Manager” application icon.

The File Manager screen appears.

The File Manager Index screen will be displayed consisting of two folders: Tree and List.

Index screen

Tree folder	Browses all folders in the SL-5500 and on the mounted cards in the “tree” format.
List folder	Browses all folders and files in the SL-5500 and on the mounted cards in the list format. Double-tap a file to open with the application related to the file.

File menu (when a folder in the List folder is focused)	
Rename...	Renames a folder.
Cut	Cuts the selected folders for later pasting. Be sure not to close the File Manager application before doing a paste command. The folder you have cut will be erased from the clipboard.
Copy	Copies the selected folders.
Paste	Pastes the cut or copied folders.
Delete...	Deletes the selected folders.
Select all	Selects all folders and files in the current directory.
Deselect all	Deselects all folders and files in the current directory.
File menu (when a file in the List folder is focused)	
Add to Documents	Adds files downloaded from Web pages to the Documents folder. Use this menu for the downloaded files only.
Open in (application name)	Opens the file with the application related to the file.
View as text	Opens the file with a Text Editor.
Rename...	Renames a file.
Cut	Cuts the selected files for later paste. Be sure not to close the File Manager application before doing a paste command. The file you have cut will be erased from the clipboard.
Copy	Copies the selected files.
Paste	Pastes the cut or copied files.
Delete...	Deletes the selected files.
Select all	Selects all files and folders in the current directory.
Deselect all	Deselects all folders and files in the current directory.

Dir menu	
Make new directory	Creates a new folder in the current directory and will be named "NewFolder". You can rename it immediately or later.
Back	Moves to the previous directory.
Upper directory	Moves to upper directory.
(Current directory)	Displays the current directory.
Sort menu (Sorts the folders and files in the List folder.)	
by Name	Sorts folders and files by name.
by Size	Sorts files by file size.
by Date	Sorts folders and files by date
by Type	Sorts folders and files by type
Ascending	Sorts all folders and files in the ascending order when checked, or vice versa when not checked.
Back icon	Moves to the previous directory.
Upper directory icon	Moves to upper directory.
Make new directory icon	Creates a new folder in the current directory and will be named "NewFolder". You can rename it immediately or later.
Cut icon (List folder)	Cuts the selected folders or files for later paste. Be sure not to close the File Manager application before doing a paste command. The file you have cut will be erased.
Copy icon (List folder)	Copies the selected folders or files.
Paste icon (List folder)	Pastes one or more folders or files.

When you cut, copy or delete a folder or a file in the List folder, move the focus on to the folder or the file by using the Cursor key. Then select (highlight) it by pressing the SELECT key. If the folder or the file is not selected (highlighted), you cannot cut, copy or delete it. You can also perform these operations for multiple folders or files at a time by selecting (highlighting) them on the screen.
